

## Movie Making Guidelines

### What do we need to do?:

1. To learn how to create a short movie, edit it, add effects and export it in different format.
2. To use a storyboard for planning the filming and editing of the movie.
3. To have the finished film shown on Pukeko Echo.

### Tasks:

1. Plan a storyboard for a short video highlighting
2. Content of each filming sequence, including scene needs
3. Filming techniques including shots
4. Narration - script details
5. Music, title and transitions
6. In your video. You should incorporate the following:
  - \* Film footage that your group has filmed
  - \* Movie title and credits
  - \* Use of black space
  - \* Voice over - linked to script
  - \* Transition effects
  - \* Advanced features (such as reversing clip direction, changing clip speed, extracting audio, creating still clips from film footage)
  - \* Music or other imported sound

### Following this

# Ask Pukeko Echo producer to view final draft, offer feedback and ideas for improvement

# Complete group reflection task and make any changes

### Finally

\*Save your final movie as a HD Quick Time movie and submit to Pukeko Echo

and

complete your assessment rubric!
